## WELCOME TO ANTALYA

The biggest advantage of the city and the area is the mild climate. In Antalya, there is no snow and frost. The area of Antalya is very suitable for water sports. Especially for the “flat water” tracks sought in the branch of sprint, the Aksu, Acisu1 and Acisu2 rivers in Antalya area are providing the opportunity of 3 different tracks in an area of 15 km<sup>2</sup>, and many Olympic national kayak teams and professional individual sportsmen are realizing their winter kayak camps in Antalya.
